COMPANY OVERVIEW

MissionLayer Systems LLC builds custom applications that use AI, document intelligence, and computer vision to automate document-heavy and image-heavy operational work — from technical requirements through production deployment, documentation, and handoff. Utah-based, serving the public sector nationwide, prime contractors, and commercial clients.

CORE COMPETENCIES

AI-Enabled Custom Software Development

Custom operational applications, AI-enabled workflow automation, APIs and backend systems, Legacy modernization, Systems integration.

Intelligent Document Processing & Computer Vision

OCR, classification, and extraction, Forms and records processing, Image classification, object detection, inspection, AI-assisted review with human validation.

AI/ML Engineering & Production AI

Generative AI, RAG, and NLP, Predictive and computer vision models, Model evaluation and serving, Prototype to production, Monitoring and MLOps.

Production engineering (supporting)

Cloud-native engineering, Kubernetes, DevSecOps, MLOps, CI/CD.

Technical consulting, assessment, and delivery support are available across all three, as an engagement model rather than a separate practice.

DIFFERENTIATORS

- AI built into complete applications, not a model somebody else has to make usable
- Prototype through production: evaluation, deployment, observability, operations
- Human review where it matters: confidence thresholds, exception queues, source references
- Documentation, acceptance criteria, and handoff treated as deliverables

KEY PERSONNEL EXPERIENCE

- Designed and operated production machine learning and AI workloads
- Built and supported Kubernetes-based application environments
- Implemented scalable APIs and model-serving infrastructure
- Developed CI/CD, observability, and infrastructure-as-code solutions
- Analyzed government procurement requirements and contracting processes

Individual experience of our founder, gained outside MissionLayer Systems LLC — not company past performance.

COMPANY DATA

Legal Name	MissionLayer Systems LLC
Business Type	Utah Limited Liability Company
Business Size	Small Business under applicable NAICS size standards
Location	Saratoga Springs, Utah, United States
Contact	Jefferson Santos, Founder & Principal Engineer
UEI	M93KGASJFEN3
CAGE Code	23N79
SAM.gov	Active through August 10, 2027

PROCUREMENT CODES

- 541511** Custom programming (primary)
- 541512** Systems design
- 541715** Applied engineering R&D
- 513210** Software publishing
- 541519** Other computer services

PSC families DA01, DE01, DF01, DD01, DH01 — assigned by the acquiring activity, listed as where this work commonly falls.
